CHENNAI INTERNATIONAL TERMINALS

Chennai International Terminals is the second container terminal in Chennai Port and is ideally positioned to tap the high growth Chennai region. Serving an ever growing hinterland and catering to the fast growing automobile, pharmaceuticals, textile, leather, light engineering and chemical manufacturing units, Chennai is the second largest container port in India, with increasing volumes and several weekly services. The region is also steadily emerging as the hub for the Indian east coast.

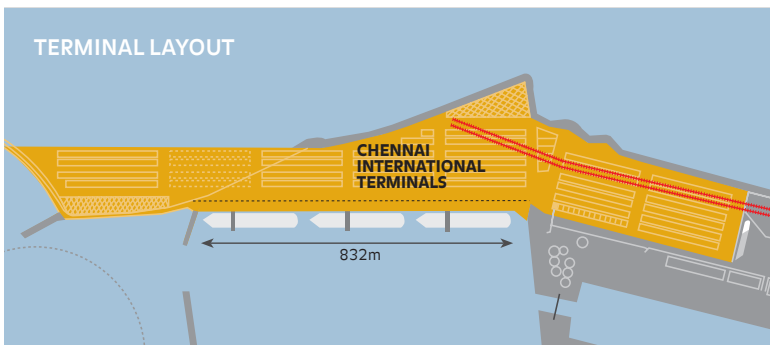

The terminal is designed to accommodate deep-draft vessels and cater to the new generation of container vessels. The terminal's connectivity to Inland Container Depot (ICD) destinations is enhanced by a seamless railway connection and a growing number of rail logistics operators. It will become operational in 2009. ■
